

```
/**  
 *1. Realizar un programa que imprima en pantalla su nombre y su correo electrónico.  
 * @author Christopher Perez Tejada  
 */  
  
public class Tarea1 {  
  
    public static void main(String[] args) {  
  
        String nombre = "Chris";  
  
        String correo = "Chris1234@gmail.com";  
  
  
        System.out.println("Nombre: " + nombre);  
  
        System.out.println("Correo: " + correo);  
  
    }  
  
}
```

The screenshot shows the output of a Java program in an IDE console. The output includes messages about recompiling the module, compiling source files, and the execution of the program. The program prints the name "Chris" and the email "Chris1234@gmail.com". The console ends with a "BUILD SUCCESS" message.

```
Changes detected - recompiling the module! :source  
Compiling 4 source files with javac [debug target 22] to target\classes  
--- exec:3.1.0:exec (default-cli) @ Tareal ---  
Nombre: Chris  
Correo: Chris1234@gmail.com  
-----  
>> BUILD SUCCESS
```

```
/**  
 * 2. Realizar un programa que imprima los números del 1 al 10 utilizando ciclos "for".  
 * @author Christopher Perez Tejada  
 */  
public class Parte2 {  
    public static void main(String[] args) {  
        for (int i = 1; i <= 10; i++) {  
            System.out.println(i);  
        }  
    }  
}
```

```
Output - Run (Parte2)
